Business Developments

(Business Environment and Initiatives)

The global economy as a whole continued to recover moderately during the current consolidated fiscal year, though there were differences among countries and regions. Japan's economy also remained on a moderate recovery track, supported by an accommodating financial environment and the government's expenditures.

In the domestic truck market, demand surpassed that of the previous fiscal year due to the impact of moderate economic expansion and tighter emissions regulations, while demand fell in overseas markets, mainly in the Middle East.

Against this backdrop, we have formulated our medium- to long-term vision of "Our heart is always with You - supporting people's life and social production activities as a CV/LCV and Powertrain excellent company" toward 2030, and have been actively engaged in product and business development and rollouts.

For the first effort in the current consolidated fiscal year, we have formulated a new Mid-term Business Plan in order to realize the mid- to long-term vision, while embodying remarkable growth and solid earning power by fully leveraging our business base that we have developed to date.

Under this Mid-term Business Plan, we have paraded policies focused on "deepening current business" to increase earnings by deepening current business, and "newly engaging with the next generation" to take bold initiatives for new business areas without being constrained by preconceptions. We will promote these policies in parallel.

(Products and Business Development)

In a core product development initiative during the current consolidated fiscal year, we upgraded the ELF light-duty truck equipped with advanced safety equipment as standard, including a pre-crash braking system (collision damage mitigation / collision avoidance assistance). We also took steps to promote connected technology. Communication terminals equipped as standard enabled customers to personally grasp the condition of vehicles. In addition, the FORWARD medium-duty truck was also equipped with the same communication terminals as standard. This enables customers to use the PREISM, an advanced original maintenance service with remote data that has previously been developed for the GIGA heavy-duty truck, on the ELF light-duty truck and FORWARD medium-duty truck as well. We offer a wide-ranging lineup of "connected" trucks from the light-duty truck to the heavy-duty truck to support customers.

In overseas markets we launched sales of the TRAGA new lightweight truck in Indonesia. The TRAGA has been developed in consideration of commercial vehicle conditions in emerging markets. By adopting commercial vehicle technologies accumulated within the company based on the D-MAX pickup truck, the TRAGA achieved the improvement of loading

efficiency and fuel efficiency for customer convenience. Our plan is to study prospects for a gradual expansion in other emerging markets.

To expand our business during the current consolidated fiscal year, we took part in demonstration tests on public roads toward commercializing trucks in caravan to travel, based on the "Future Investment Strategy 2018" promoted by the government. To check running status in extended-mileage driving and under various road conditions, demonstration tests were conducted on the Joshin-Etsu Expressway in November. Since December we have also participated in demonstration tests on the Shin-Tomei Expressway in December for autonomous driving system, which adopts a new LKA (Lane Keeping Assist) technology in addition to CACC (Cooperative Adaptive Cruise Control). We will participate in demonstration tests promoted by the government and cooperate with the government to commercialize trucks in caravan to travel with a view to finding solutions to social issues.

We have also signed a letter of Intent with respect to a business alliance in the powertrain business with Cummins Inc., a U.S.-based global-scale diesel engine manufacturer, leading to the agreement to commence discussion. The automobile industry is facing "a once-in-a-century innovation" where power sources become diverse that includes electrification mainly in developed countries. Diesel engine is still being counted on as a promising power source for a multipurpose-use commercial vehicle and industrial powertrains as it is anticipated to be used under various environment both in developed countries and emerging countries, whereby we believe diesel engine continues to be a useful powertrain. The two companies shared a common commitment to actively deal with the development of a next-generation diesel engine that is more environment-friendly than ever, while responding to diversification trends such as electrification, starting exploring potential opportunities for collaboration to establish long-term and comprehensive partnerships. We will endeavor to enhance development efficiency by fully fusing the technologies owned by the two companies and provide powertrains that suit national or regional energy situations as well as the wide-ranging needs and use of customers, through the collaboration aimed at the development of next-generation powertrains with price- and product-competitiveness.

(Fundraising)

Funds raised during the current consolidated fiscal year included 45.0 billion yen of long-term borrowings procured by "ISUZU Leasing Services Limited.," a leasing business company engaged in sales financing in Japan.

(Capital Investments)

Capital investments during the current consolidated fiscal year totaled 72.2 billion yen. Major ongoing uses of capital investments include product development to comply with emissions regulations, product development to respond to advanced technology, and capacity reinforcement of engine manufacturing facilities of the Tochigi Plant.

Business Results

During the current consolidated fiscal year, domestic vehicle sales increased by 2,169 units (3.0%) year on year to 74,431 units, thanks to our success in capturing a last-minute rush in demand for light-duty vehicles before the switching to new emissions regulations. Overseas vehicle sales increased by 28,261 units (6.6%) year on year to 457,891 units due to favorable sales of pickup trucks in Thailand and recovery in Asian and African markets. As a result, total vehicle sales, both domestic and overseas, increased by 30,430 units (6.1%) year on year to 532,322 units.

As for sales amounts of products other than vehicles, while sales of parts for overseas production decreased by 14.2 billion yen (19.8%) compared to the previous fiscal year to 57.3 billion yen, sales of engines and components increased by 16.5 billion yen (13.0%) year on year to 143.5 billion yen due to an increase in the number of sales of industrial engines. Other sales jumped by 23.9 billion yen (5.8%) to 432.8 billion yen over the previous fiscal year as a result of growth in the vehicle life-cycle management business such as after-sales services.

Consequently, net sales totaled 2,149.1 billion yen, a 3.8% or 78.8 billion yen year on year gain as a result of growth in pick-up trucks and engines and components in the Thai market and the vehicle life-cycle management business. This includes 819.1 billion yen of net sales in Japan (an increase of 4.1% year on year) and 1,329.9 billion yen of net sales in the rest of the world (an increase of 3.6% year on year).

The table below shows sales by product.

Category		Sales Volume (units)	Sales Amount (JPY billion)
Vehicles	Heavy-duty (and medium-duty) vehicles	72,200	483.0
	Light-duty vehicles and others	460,122	1,032.3
	Subtotal	532,322	1,515.3
Parts for overseas production		-	57.3
Engines and components		-	143.5
Service parts and others		-	432.8
Total		-	2,149.1

On the profit and loss front, the afore-mentioned sales growth effect and efforts to reduce and control raised operating profit by 6.0% compared with the previous fiscal year to 176.7 billion yen and ordinary profit by 8.9% over the previous fiscal year to 189.0 billion yen. Net profit attributable to owners of the parent climbed by 7.4% year-on-year to 113.4 billion yen.

2) Issues Facing the Corporate Group

The business environment surrounding the Group is expected to become challenging for the Group. Domestic factors include a decreased desire for purchasing resulting from the impending consumption tax hike and signs of slowdown in capital investments due to the completion of the Olympic Games-related investments. Overseas factors include market contractions arising from the economic slowdown in China and growing geopolitical risks stemming from the political trends in Europe. In the business environment surrounding the automotive industry in particular, major changes to society and technologies may come to light in the future, including responses to advanced technology represented by “CASE.”

Within this management environment, the Group established seven key challenges in the Mid-term Business Plan; 1. Innovate our businesses through collaborative activities, 2. Expand the overseas CV business, 3. Strengthen the LCV business, 4. Strengthen the powertrain business, 5. Accelerate advanced technology development, 6. Promote digital innovation, and 7. Create new businesses based on the policies of “deepening current business” and “newly engaging with the next generation.”

The Group will make efforts to provide solutions to the seven key challenges and focus on finding solutions for the following social challenges through its business; “Productivity growth of Logistic industry,” “Logistic optimization,” “Protect living condition at disaster and emergency,” “Resolving global environmental issues and Maintaining economic growth,” and “End hunger.” Furthermore, we will strive to create social value through our business activities with the aim of achieving sustainable growth in harmony with society.

At the same time, we will make further efforts to monitor and improve quality and enhance our governance system.

We hope that our shareholders will continue to give us their unflagging encouragement and support.
